### Road Occupancy Permit Application

Please read carefully:

A Road Occupancy Permit is required for work within any portion of the public right-of-way (the road, boulevard, shoulders and sidewalks), whether the work requires a closure or lane restrictions or not. The Works Department is responsible for issuing permits for any work done on regulated roads. Please go to the following URL to get a listing of Regulated Roads.

## Permit Central

Permit Central is a web application that provides a user interface for the public to create a permit application online, and for municipal staff to manage the approval process of the permit applications.

**Location Entry** - Users may enter locations by both text boxes (e.g., "Frederick from Weber to Lancaster") and by pointing and clicking on the map. Users may also trace a route on the map, supporting scenarios such as parade routes or moving routes for an oversize-load.

**Customizable Permit Types** - System administrators may create and edit permit types with their own custom forms, custom fields, terms and conditions, and permit certificate template.

**Collaborative Review and Approval** - System facilitates review and comment by various groups of staff prior to final approval.

**Automated Notification** - Once the permit is approved, Permit Central automatically notifies the applicant by email. PDF version of the approved permit is also sent to the appropriate staff and the applicant.

**Drawing Tool (optional)** - Applicant can directly markup drawings online to be submitted as part of the permit application.

**File Attachment** - Permit Central supports configurable file attachments for documents such as insurance certificate and work zone traffic drawings.
