

Road information management and communications

For agencies with road information, and all that need it

Who we are

Transnomis is a Canadian technology company, with intelligent transportation systems (ITS) and public safety communications expertise.

Who we serve

Transnomis clients include provincial governments, municipalities of all sizes, traffic control companies, and a national railway.

Where to start

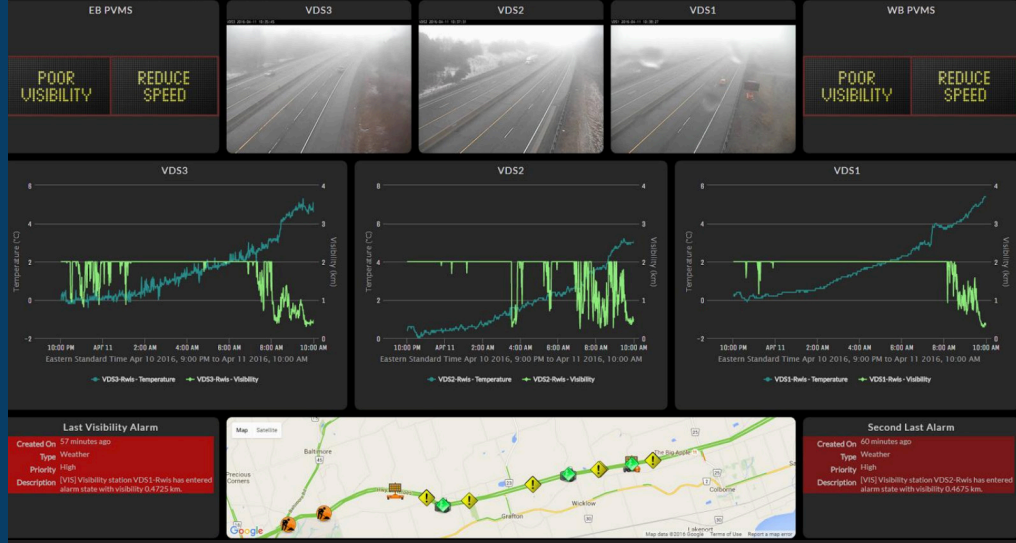

Transnomis offers the following starting points:

- + Municipal511 for municipal public works and emergency services
- + ITS Central for provincial and municipal traffic management centers
- + VMS Central for traffic control organizations and departments

We help build smart, safe, and connected communities

ITS Central

Transnomis ITS Central seamlessly integrates internal systems, field hardware devices, and external data sources, into an elaborate, map-centric, intelligent transportation system (ITS). It is developed as the starting point for standalone ITS solutions, such as advanced traffic management systems (ATMS) and roadway event management systems.

ITS Central can be hosted on your servers, or in the cloud. The application can be accessed through web browsers on smartphones, tablets, desktops and ultra-high resolution display walls in traffic control centers.

Transnomis offers a long list of add-ons to deliver a system that meets all of your needs today, and in the future:

- + Event management module
- + Variable message sign module
- + CCTV module
- + Custom dashboard module
- + Push notification module
- + Permit module
- + Public 511 website module
- + Travel time module
- + Asset tracking module
- + Signal system integration
- + Customized modules to integrate with your existing systems
