Road Occupancy Permit Application

Please read carefully:

A Road Occupancy Permit is required for work within any portion of the public right-of-way (the road, boulevard, shoulders and sidewalks), whether the work requires a closure or lane restrictions or not. The Works Department is responsible for issuing permits for any work done on municipal roads. Please go to the following URL to get a listing of Project Types: [http://www.townofshelburne.ca/transportation/works/road-occupancy-permits.aspx](#)

Permit Central

Permit Central is a web application that provides a user interface for the public to create a permit application online, and for municipal staff to manage the approval process of the permit applications.

Location Entry - Users may enter locations by both text boxes (e.g., "Frederick from Weber to Lancaster") and by pointing and clicking on the map. Users may also trace a route on the map, supporting scenarios such as parade routes or moving routes for an oversize-load.

Customizable Permit Types - System administrators may create and edit permit types with their own custom forms, custom fields, terms and conditions, and permit certificate template.

Collaborative Review and Approval - System facilitates review and comment by various groups of staff prior to final approval.

Automated Notification - Once the permit is approved, Permit Central automatically notifies the applicant by email. PDF version of the approved permit is also sent to the appropriate staff and the applicant.

Drawing Tool (optional) - Applicant can directly markup drawings online to be submitted as part of the permit application.

File Attachment - Permit Central supports configurable file attachments for documents such as insurance certificate and work zone traffic drawings.
